Our business philosophy is founded on four principles:

Service – we offer high levels of service to our pharmacy customers and manufacturer suppliers, and to the patients we serve in our pharmacies. We deliver reliably, consistently and on schedule with rapid order turnaround times. Service levels are monitored hourly in every one of our 184 branches and are regularly surveyed in our retail outlets.

Excellence – our Group's priority is simple, to be the first choice for pharmacists and patients and the leader in our market by achieving excellence in everything we do.

Partnership – working together with our customers and suppliers we can derive mutual added value and improve the health of the millions of patients who depend on us.

Innovation – as a European leader we realise the importance of looking to the future. Our vision can be seen not only through the development of state-of-the-art systems, offering a more efficient service to pharmacies, but also in our unique support and service solutions to our customers. Such innovative thinking keeps us one step ahead in the pan-European market.

Our wholesale network – the backbone of healthcare delivery

Alliance UniChem’s integrated distribution and technically advanced networks provides millions of European citizens with the healthcare products they need to preserve and restore their health and wellbeing. However, Alliance UniChem’s operational efficiency does not rest solely upon a sound organisational and managerial structure; it is above all the outcome of a business philosophy, shared by every one of the Group’s operating units, which gives absolute primacy to the quality of service to customers, pharmacists and manufacturers.
